

## Cisco Data Center Unified Computing Implementation v3.0

### Overview

This 5-day hands-on course focuses on Cisco Unified Computing System (UCS) deployment and operations. You will learn how to configure and manage UCS servers with consolidated I/O networking for LAN and SAN connectivity, and how to virtualize server properties to enable simple and rapid mobility of server OS images between physical servers.

### Audience

Each participant will leave with a recognised certificate

In the lab, you will practice implementing a multi-tenant management model, configuring fault tolerance, backing up and restoring system configurations, and using the built-in monitoring and troubleshooting tools. You will also install and configure VM-FEX with the M81KR adapter and the Cisco Nexus 1000V Virtual Switch on the UCS infrastructure.
